Protecting Yourself After A Data Breach

As you may know, millions of Americans have had their personal information exposed by the recent Equifax data breach. Rest assured, your credit union has the proper member identity verification procedures and policies in place to help mitigate these risks. Listed below are some safety tips that can help you protect yourself from identity theft and fraudulent transactions.

- **Keep Your Information Up To Date.** Be sure to keep your contact information with the credit union up to date so that we can get in touch with you in the event of suspicious account activity.
- **Review your account statements regularly.** Our online and mobile banking solutions allow you to check your accounts in real time. Be sure to review your transactions regularly.
- **Report suspicious transactions immediately.** Be sure to report any suspicious transactions to the credit union immediately so that we can start the proper procedures to stop any future fraudulent transactions from being drafted from your accounts.
- **Sign up for fraud alerts.** Sign up for fraud alerts with the Shazam Bolt\$ app.
- **Beware of Phishing Emails.** Phishing emails are circulating and attempting to steal your personal information. Be sure to verify the source of an email before clicking on any links or entering any personal information.
- **Monitor and/or freeze your credit.** Equifax is providing free credit monitoring services for one year regardless of whether you are affected by the hack. [Click here](#) for more information on these services.

[Click here](#) for information about how to freeze your credit.
